FIG. 35

The diagram illustrates a cooling system for a mechanical assembly. The assembly consists of a motor (84) driving a shaft (86) with a component (92) inside a housing (88). A cooling circuit (89) is connected to the assembly. The circuit includes a force feed pump (83) and a cooling device (90). The circuit is divided into sections 91a, 91b, and 91c. A component (87) is also shown in the circuit.
